College

# SPRING 2023

**FINAL** Course Schedule  
Henniker January 23 – May 5

updated 1.27.23

after this date please refer to your MyNEC for updates.

## Spring 2023 Semester

January 23 (Monday)	Classes begin
January 25 (Wednesday)	Last day to Add or Drop - 1 <sup>st</sup> 7 week course
January 27 (Friday)	Last day to Add or Drop - full term course Last day to file Intent to Graduate (current term)
February 3 (Friday)	Last day to file Pass/No record - 1 <sup>st</sup> 7 week course
February 17 (Friday)	Last day to file Pass/No record - full term course
February 22 (Wednesday)	Last day to Withdraw from 1 <sup>st</sup> 7 week courses
February 24 (Friday)	Last day to finish Incompletes for Fall & Winter term
March 12 (Sunday)	1 <sup>st</sup> 7 week courses end
March 13 – 19 (Mon - Sun)	Spring Break
March 20 (Monday)	First day of 2 <sup>nd</sup> 7 week courses
March 22 (Wednesday)	Last day to Add or Drop - 2 <sup>nd</sup> 7 week courses
March 31 (Friday)	Last day to file Pass/No record – 2 <sup>nd</sup> 7 week course Last day to petition Pass/No record to grade Last day to Withdraw – full term course (Fall)
April 19 (Wednesday)	Last day to Withdraw – 2 <sup>nd</sup> 7 week course
May 5 (Friday)	Last day of Spring term (full and 2 <sup>nd</sup> 7 weeks)
May 6 (Saturday)	Commencement

### EXPLANATION OF CLASS DAYS/TIMES

**M = MON.      T = TUES      W = WED      R = THURS      F = FRI**

### Military Time to Standard AM - PM Time

Military	Standard	Military	Standard
0800	8:00 AM	1500	3:00 PM
0900	9:00 AM	1600	4:00 PM
1000	10:00 AM	1700	5:00 PM
1100	11:00 AM	1800	6:00 PM
1200	NOONTIME	1900	7:00 PM
1300	1:00 PM	2000	8:00 PM
1400	2:00 PM	2100	9:00 PM

### EXAMPLES

Class meets:

0900-1110 MW	(Mon & Wed from 9:00 am to 11:10 am)
1210-1320 MWF	(Mon & Wed & Fri from 12:10 pm to 1:20 pm)
0950-1130 T	(Tuesday from 9:50 am to 11:30 am)
1300-1450 TR	(Tues & Thurs from 1:00 pm to 2:50 pm)
1830-2100 R	(Thursday from 6:30 pm to 9:00 pm)

## How to Register on MyNEC

Log in to MyNEC (<https://www.nec.edu/info-for/student-faculty-and-staff-resources/academic-resources/#MyNEC>)

- Click on “Student Services & Financial Aid”
- Click on “Registration”
- Click on “Add/Drop Classes”
- Choose the correct term- Spring 2023 Semester
- Enter CRN numbers and hit “Submit Changes”  
If you need to find an additional class, click on “Class Search”.
- To see all of the classes offered, click on the top “Subject”, drag through the list. You can then refine your search to look by department, LAS requirement, etc.
  - Click on “Course Search”
  - This will bring up all of the class offerings for the term.
  - NOTE: Classes that are at the 5000-level or above are graduate courses and you may not sign up for them.
  - Closed classes have “C” on the left, open classes have box.
  - To sign up for the class, click on the box and a check will be inserted.
  - Click on “Register” at the bottom of the page.
  - If the class will work with your schedule, it will be added.
  - If there is a problem (time conflict, prerequisite) you will see a red error box.
- To confirm you are registered, return to the Registration Menu and select “Student Detail Schedule.”

## SPRING 2023 COURSE DESCRIPTIONS NOT FOUND IN CATALOG

Residential Undergraduate Catalog: <https://catalog.nec.edu/>

### **BI 2990 Unseen World: Microbiology**

This course explores the bacteria, fungi, and viruses that impact our lives. From the foods we eat to the medicines we take; humans encounter microorganisms daily. Topics include: the role of microbes in climate change, agriculture, human health, and disease. Students will apply the scientific method in the lab to explore the roles of microbes in fermentation and spoilage. Using lab techniques, students will discover the hidden world of microbes in kombucha, sauerkraut, yogurt, and other fermented beverages.

### **BU 3990 Introduction to Sustainability**

Sustainability is a multi-disciplinary field of study incorporating both natural and social sciences, business, and engineering. The theory and practice of sustainability depends on meeting the demand and consumption of natural resources without exhausting the supply for others today and in the future. Course content focuses on efforts to meet society's long-term requirements for food, water, shelter, energy, transportation, and social justice while maintaining a vibrant growing economy. Sustainability is a growing field as the business world is embracing and implementing sustainability at all levels of operation as well as how progress is measured and assessed.

### **CJ 2990 Drugs in America**

This course is designed to assist students with understanding the Criminal Justice system's role in finding solutions to America's substance abuse problem. The primary focus of this class is for students to have an understanding of which drugs (both street and pharmaceutical) are being misused and what the Criminal Justice system and society is doing to combat it. Students will explore the efficacy of standard enforcement measures versus newer tactics that work to treat addiction before incarceration, such as decriminalization measures, drug courts and diversion.

### **CJ 2990 Cyber Criminology**

This course will provide students with an overview of computer-related crimes, and how law enforcement officials investigate them. The course begins by describing the environment that has been created through information and communication technologies, and how this new environment facilitates different types of behavior. The course then moves into defining and describing the different types of computer-related crimes, the techniques used by officials, and the legal issues inherent in combating cybercrime. This course provides an overview of the field of combatting cybercrime. It covers core cybercrime topics including dark web forums, critical infrastructures, cyber threats and vulnerabilities, and criminal Marketplaces. Students work to become familiar with fundamental cybercrime concepts, technologies and practices, and develop a foundation for further study in cybercrime.

### **CO 3990 Intro to Mass Media**

The mass media are so pervasive in contemporary society that students in many disciplines will find this course valuable. Intro to Mass Media provides a comprehensive overview of the development of such media as newspapers, magazines, books, radio, television, film, recordings, and the Internet. We also study and analyze: the convergence of traditional media with the digital world; the importance of being media literate and understanding/using media grammar; media bias; the rise and impact of social media; media theory and research; and interactive media (video games and virtual reality). In addition, this course introduces students to issues of regulatory control, audience analysis, media ethics, and international mass communications.

### **CO 3990 Media Literacy**

Teaches the ability to analyze and evaluate information received from the media. Students will deconstruct media content--photographs, newspaper articles, advertisements, tv shows, movies, documentaries, and develop an understanding of how media influences us and how we in turn can influence others. This class will allow you to think more strongly about the media and how they impact you as a consumer, creator, and member of a democracy.

### **ES 3990 Introduction to Sustainability**

Sustainability is a multi-disciplinary field of study incorporating both natural and social sciences, business, and engineering. The theory and practice of sustainability depends on meeting the demand and consumption of natural resources without exhausting the supply for others today and in the future. Course content focuses on efforts to meet society's long-term requirements for food, water, shelter, energy, transportation, and social justice while maintaining a vibrant growing economy. Sustainability is a growing field as the business world is embracing and implementing sustainability at all levels of operation as well as how progress is measured and assessed.

### **HS 2990 Conspiracies in American History**

Americans have been fascinated by conspiracy theories since the colonists at Roanoke went missing in 1590. In this class, we will explore several famous conspiracies, including the Salem Witch trials, Area 51, two Presidential assassinations, and even QAnon, and ask how and why so many Americans chose to believe there was more to the story than they were being told.

### **HS 2990 Public History: D.C. Travel**

**Course description coming soon**

### **HS 2990 Topics in History: TBA**

**Course description coming soon**

### **KI 2990 Theory of OE & Ropes Crse Mgt**

This course examines the theoretical basis of experiential and outdoor education including the education, psychological, and historical underpinnings. Time spent in

this course is spent in classroom setting and on the ropes course. Emphasis is given to each student's philosophical development of leadership and education. The theories of outdoor education and leadership are researched, explored, and discussed in this course. The course also explores and experiments how Ropes Courses are Educational and Therapeutic tools used in programming for developing efficacy, communication, and team building. Students will participate in extensive group experience. Successful completion of this course prepares students to design and lead experiential education activities both indoors and out. Prerequisites: KI 1110 or SM 1510 or ED 1000, Minimum of 24 credits earned *Offered every spring Credits: 4*

### **LAS 1110 Are We Living in The Matrix?**

"The Matrix" raises the question: Is any of this real? Using "The Matrix" as a starting point, through philosophy, art and religion, the course examines humanity's relationship to a nature which may or may not even be out there, and traces the implications for both alternatives. Along with covering other works of sci-fi that carry similar themes, the course examines the philosophers whose ideas were the inspiration for The Matrix, such as Socrates, Plato and Descartes. The main assignments will be project-based and will mirror real things that real people do in the real world (if there is one, that is). Students will gain competencies in understanding core philosophical concepts and their impact on humanity, nature, and the environment, explaining these concepts by adapting them to new audiences, and relating them to real-world issues and problems.

### **LAS 1110 Communicating Nature**

In *The Nature Principle*, author Richard Louv tells us: "The more high-tech we become, the more we need nature." Does modern life allow us to be in tune with nature? In this high-tech world, how interdependent are we with other humans and the life supporting eco-systems around us? In *Communicating Nature*, author Julia B. Corbett looks to have us understand that all the message we have been fed through many forms of communication have helped to frame our view of nature. By exploring and analyzing the language used in discussions of the natural world as it streams to us from any sources: news outlets, conservation blogs and websites, poets, writer, corporate mission statement, documentaries, soundscape ecology, advertising images we can step back and look critically at our own beliefs. What does it mean to be "Human" within our natural world? This class looks to be a fun, dynamic, and interactive course! We need your participation to help make it great! Using a multi-disciplinary approach this class will engage readings, documentaries, and the exploration of the land itself, to better understand what it means to see ourselves as being a part of nature. To see ourselves as growing to care for the human fulfillment nature may provide. We will consider whether the idea that our rampant use of technologies has caused us to step further away from nature, further than at any other time in our evolutionary process. And is this even a concern to you?

### **LAS 1110 End of the World As We Know It**

This course will explore how American culture sometimes labels various events or processes as cataclysm or apocalypse. First, we will examine how chattel slavery combined with cotton culture to change the landscape of America, culminating in the cataclysmic American Civil War. Next we will explore the role of natural disaster and end-of-the-world scenarios in popular culture and ask how this might affect how we deal with the reality of climate change or nuclear holocaust. Finally, we will consider how our political culture has come to grips with the possibility of the apocalyptic predictions of climate change in the near future.

### **LAS 1110 Ethics and Capitalism**

Capitalism has been a powerful force in shaping the world as we know it. But has the output been morally good or bad? How do we weigh the opportunity afforded through the free-market with the marginalization, oppression, and pervasive inequality within the distribution of primary social goods? This course examines that very question by first exploring a normative ethical framework, upon which, to evaluate morality. Capitalism and some related economic concepts will be defined and will serve as the focus of the moral evaluation. Related literature, historical events, political theory, recent organizational trends, and sociological phenomena will also be included within the evaluation.

### **LAS 1110 Food, Farms, and the Future**

This course is a seminar that explores one of the oldest and most essential intersections of humans and their environment: agriculture. The course will focus in particular on sustainability and local farming. A multidisciplinary course, it will explore the connections between agriculture and literature, arts, sciences, and history while looking to the uncertain future of farming. A strong emphasis is placed on the development of critical thinking and writing skills. It is designed to meet the LAS1110 requirements for new students.

### **LAS 1110 Will Climate Change Change My Life?**

As we enter the social and environmental disruptions of a rapidly changing climate, what is, and will be, the impact on you? This course is designed to help students understand a global environmental problem in the context of their own lives. To reach this point students will research and discuss the scientific method, climate research techniques, and the current predictions of climate change impacts on a global, national and regional scale. We will explore the inherent social issues of a global event including climate refugees, social justice, economic disruption, and cultural change and how these could impact students. Given a background in the current science, students' final project will be to design a lifestyle concept map. It will serve as a visual framework of the impact of climate change on an individual, and an outline of behavior that could reduce greenhouse gasses and mitigate the impact of climate change.

### **LAS 1120 Civil Rights and Star Trek**

Launched amidst the civil rights movement of the 1960's, *Star Trek* boldly went where no other TV show had gone before by placing a black female officer on the

bridge crew of Starfleet's flagship vessel, and rightly earned its place in our nation's civil rights history. From the 1960's to today, Star Trek continues to explore issues of race, gender, sexual orientation, and civil rights through the lens of science fiction, holding a mirror to our own society's issues. In this course, you'll watch a lot of Star Trek, and that will be a lot of fun, but you'll also learn about the struggles for civil rights and what constitutes the nature of humanity and personhood.

**LAS 1120 Exp America Balance Land Mgt**

Experience your America: The balance, controversy, and importance of national land management. This course comes on the back side of the National Parks Service Centennial and major land protests. How does the government impact the land that we have set aside to preserve, enjoy, explore, and more? This course is an exploration into the history of Land management from both a political and outdoor perspective. The many facets of land management will be used as the basis for discussion, debate, and research. The experiential component during this course will be a group project that serves, researches, or explores land set aside for public use.

**LAS 3110 Storytelling as Research**

This course will examine narratives, both historical and current, to analyze and reflect on local and global issues pertaining to civic engagement and the natural environment. Students will have the opportunity to explore how storytelling can help to promote the common good by allowing individuals to share their lived experiences. Students will practice narrative inquiry by writing their own narratives. Additionally, students will have the opportunity to read global narratives in order to draw connections between the responsibilities humans have to their local civic and natural environments, and their responsibility to global concerns of democratic freedom, human rights, and the natural environment. Students will use what they have learned within their individual disciplines to connect to the greater understanding of the interrelationship between disciplines.

**PE 1990 Dodgeball**

This course will include instruction of the basic rules, techniques and skills needed to play dodgeball at any level. The student will also learn the mental, physical and social benefits of participation in dodgeball as a lifetime sport. No previous dodgeball skills are necessary.

**PE 1990 Basic Skating**

This course will include instruction in the basics of ice skating. Students will learn and participate in skating activities on the ice throughout the course. This is an activity-based course so students will engage in learning skills in each class. This is a recreational class designed for beginners and/or those with some skating experience. No previous skating skills are necessary. Prerequisites: None. Students must provide their own skates. 1 credit

**PE 1990 Floor Hockey**

This course will include instruction of the basic rules, techniques and skills needed to play Floor Hockey. The student will also learn the mental and physical benefits

of participation in Floor Hockey as a lifetime sport. This is a recreational activity-based course where students will engage in learning skills and game play during each class. No previous Floor Hockey experience is necessary. Prerequisites: None. 1 credit

**PL 2990 God of the Mystics**

Sometimes, as human knowers, we seek answers that transcend the horizon informed by reason. Admittedly, there are many paths to follow in searching for answers to the God question. Within this course, we will explore how western philosophy and three monotheistic western religious traditions, Judaism, Christianity, and Islam, have employed mysticism to know God beyond the limits of reason.

This seminar develops the student's ability to appreciate differences in the search for meaning and encourages the ability of the students to connect discrete fields of study by analyzing context and connections. Exposure to the interrelated nature of comparative religion, philosophy, as well as sacred literature, theology, poetry, and history, enhances the student's understanding of our shared humanity as reflective and creative beings.

**PL 2990 When the Joke Becomes Reality: Satire, Rhetoric, and Social Change**

Satire. Whether it's lighthearted and funny or sarcastic and acerbic, one thing satire is not is powerless. Effective satire is a rhetorical device; it persuades us to see the world differently. In *When the Joke Becomes Reality: Satire, Rhetoric, and Social Change* students will not only learn about and analyze early and contemporary examples of satire; they'll leverage those analytical skills to improve upon their own persuasive writing abilities. Students will likewise lean into their own satirical temperaments, composing projects that use satire to comment upon groups, behaviors, and institutions in an effort to persuade their audience to think differently about their worlds.

**PO 2990 Sex, Lies, & Scandals: Political Corruption**

Scottish philosopher, economist, and historian David Hume famously observed that "The corruption of the best things gives rise to the worst." Political corruption is a manifestation as old as the practice of politics itself. Corruption is easily exemplified in American politics by illicit behavior by politicians and high profile figures. Consider public scandals such as Watergate and Tea Pot Dome, lies of historical significance such as Bill Clinton's dodging of whether he had sexual relations with Monica Lewinsky and George H.W. Bush breaking his promise to not raise taxes, or private sector scandals with vast implications for the public sphere such as the collapse of Enron and Bernie Madoff's Ponzi scheme intended to defraud investors.

**PP 2990 Intro to Insurance & Risk Mgmt**

This course introduces students to the nature of risk, risk identification, general risk management techniques, and the management of risk through insurance. It covers

why the individual or corporation purchases insurance, what constitutes an intelligent insurance plan, what products are available in the insurance marketplace, and how those products are regulated.

**SM 2990 Theory of OE & Ropes Crse Mgt**

This course examines the theoretical basis of experiential and outdoor education including the education, psychological, and historical underpinnings. Time spent in this course is spent in classroom setting and on the ropes course. Emphasis is given to each students philosophical development of leadership and education. The theories of outdoor education and leadership are researched, explored, and discussed in this course. The course also explores and experiments how Ropes Courses are Educational and Therapeutic tools used in programming for developing efficacy, communication, and team building. Students will participate in extensive group experience. Successful completion of this course prepares students to design and lead experiential education activities both indoors and out. Prerequisites: KI 1110 or SM 1510 or ED 1000 , Minimum of 24 credits earned *Offered every spring Credits: 4*

**TH 3990 Topics: Acting for the Camera**

Acting for the Camera introduces students to the idea of playing to the camera versus the back of the house. Students will study acting techniques particular to the cinematic form, including blocking for the camera, mic technique, and the challenges of maintaining a consistent performance while acting out of sequence. In-class exercises will include scene analysis, technical demonstrations, and group projects where students work together to stage and shoot scenes for the camera.

**WR 1015 Writing in Lib Arts/Sciences I**

The central goal of the Writing curriculum is to produce confident writers who are “rhetorically aware,” who analyze the social contexts that create occasions for writing, consider the needs of potential audiences, and make wise choices about content, format, and style. This course emphasizes a process approach to writing that involves critical thinking, drafting, and revising. In order to be successful in any discipline, students are going to be required to demonstrate their knowledge and abilities through writing.

Writing 1015 is an evidence-based, writing intensive course designed to improve critical thinking, reading, and writing proficiencies through guidance in a variety of academic formats. Students will develop strategies for turning their experience, observations, and analyses into evidence suitable for academic writing. Over the course of the term, students will build upon their developing critical thinking skills to learn the processes necessary for gathering and incorporating research material in their writing. Students will learn how to evaluate, cite, and document primary and secondary research sources, as well as how to develop arguments and support them with sound evidence.
