December 8 (Friday)	Last day of Fall term (full and 2 <sup>nd</sup> 7 week)

### EXPLANATION OF CLASS DAYS/TIMES

**M = MON.      T = TUES      W = WED      R = THURS      F = FRI**

### Military Time to Standard AM - PM Time

<b>Military</b>	<b>Standard</b>	<b>Military</b>	<b>Standard</b>
0800	8:00 AM	1500	3:00 PM
0900	9:00 AM	1600	4:00 PM
1000	10:00 AM	1700	5:00 PM
1100	11:00 AM	1800	6:00 PM
1200	NOONTIME	1900	7:00 PM
1300	1:00 PM	2000	8:00 PM
1400	2:00 PM	2100	9:00 PM

### EXAMPLES

#### Class meets:

0900-1110 MW	(Mon & Wed from 9:00 am to 11:10 am)
1210-1320 MWF	(Mon & Wed & Fri from 12:10 pm to 1:20 pm)
0950-1130 T	(Tuesday from 9:50 am to 11:30 am)
1300-1450 TR	(Tues & Thurs from 1:00 pm to 2:50 pm)
1830-2100 R	(Thursday from 6:30 pm to 9:00 pm)

### How to Register on MyNEC

Log in to MyNEC (<https://www.nec.edu/info-for/student-faculty-and-staff-resources/academic-resources/#MyNEC>)

- Click on “Student Services & Financial Aid”
- Click on “Registration”
- Click on “Add/Drop Classes”
- Choose the correct term- Fall 2023 Semester
- Enter CRN numbers and hit “Submit Changes”  
If you need to find an additional class, click on “Class Search”.
- To see all of the classes offered, click on the top “Subject”, drag through the list. You can then refine your search to look by department, LAS requirement, etc.
  - Click on “Course Search”
  - This will bring up all of the class offerings for the term.
  - NOTE: Classes that are at the 5000-level or above are graduate courses and you may not sign up for them.
  - Closed classes have “C” on the left, open classes have box.
  - To sign up for the class, click on the box and a check will be inserted.
  - Click on “Register” at the bottom of the page.
  - If the class will work with your schedule, it will be added.
  - If there is a problem (time conflict, prerequisite) you will see a red error box.
- To confirm you are registered, return to the Registration Menu and select “Student Detail Schedule.”

## **FALL 2023 COURSE DESCRIPTIONS NOT FOUND IN CATALOG**

Residential Undergraduate Catalog: <https://catalog.nec.edu/>

### **AC/BU 3990 Sustainable Accounting**

This course traces the twenty-five-year history of work by financial managers, accountants, good governance, and corporate social responsibility advocates to develop reliable and relevant measures of corporate performance in non-financial areas of management. Students will explore specific environmental situations and fraud cases that pushed sustainability accounting into prominence and will learn about recent changes in SEC (securities and exchange commission) and European legislation that will result in the adoption of common standards for corporate sustainability measurement in the future. Common sustainability measurement standards will lead to greater comparability across companies, reduce 'greenwashing' behavior, and put pressure on poor performers to improve their environmental, social, and governance performance.

Students interested in sustainability, accounting, or management will appreciate the opportunity to see firsthand how auditors go about measuring carbon emissions, verifying supply chains for fair labor practices, checking claims of recycling and reuse of materials, and using financial accounting reporting practices to ensure the reliability of information to investors and the public about a company's sustainability practices. As part of the course, we will conduct an audit of an organization's non-financial performance using the new standards being discussed by the SEC and the ISSB (International Sustainability Standards Board).

**Prerequisites:** Either AC2210/BA2210 or BU3990/ES3990 Intro to Sustainability or AC2330 Survey of Accounting

### **CJ 2990 Cyber Intelligence**

This course exposes students to intelligence gathering and investigative support from cyber related resources. Students are able to develop an advanced understanding of open-source intelligence gathering and information development capabilities. Case study analysis, and raw data collection experience, is gained in furtherance of students' ability to develop credible information supporting criminal investigation initiatives.

### **CJ 2990 Digital Forensics**

This course explores advanced topics and methodologies for examining digital evidence over the course of fifteen weeks. Digital Evidence includes 'endpoints' such as laptops and/or desktop computing systems, mobile devices, tablets, IoT devices, and Cloud storage. Topics taught in this class include File System Forensics, Computer Operating System Forensics, and Mobile Device Forensics. Students are challenged to work individually to examine and prepare detailed reports showing the relevance of digital evidence to mock cases and/or scenarios based upon real-world situations. This course presents a higher level of technical

detail and will balance theory amongst hands-on aspects while conducting digital forensic examinations.

### **CJ 3990 Interviewing and Interrogation**

This course provides an in-depth examination of interpersonal communications with a specific focus on interviews conducted by law enforcement personnel, including victim, witness, informant, and subject interviews. Emphasis is placed on rapport-based interviewing techniques; developing effective questioning strategies; identifying, managing, and avoiding common forms of resistance; adapting to intercultural situations; and identifying and managing deception. Each component of the course is backed by the most recent academic research in the field.

### **CO 3990 Broadcast Writing**

This course will teach the basic structures of writing for broadcast news. Students will learn how to construct broadcast scripts while focusing on the anatomy of news copy. Students will learn about attention to detail and the importance of script structure. Focus will also be given to the legal implications of wording, attribution, and editorial commentary. Students will also learn the fundamentals of using sound and visual elements and how to incorporate them into a well written story. Attention will also be given to script time/length, creativity and working under deadlines. Lastly, students will also learn the value and power of well written and presented broadcast stories with a focus on sound and video.

### **CO 3990 Sports Reporting**

This course will give students an opportunity to understand how the basic techniques of broadcast news journalism apply to sports reporting. Students will apply news gathering skills, using video and sound, to construct sports stories. This course will allow students to write sports copy and learn how to deliver it to an audience. Students will also get an introduction on how to "go live" and deliver reports in front of an audience. The class will also understand the importance of athletic competition and how it often bleeds over into the world of social activism. Students should have a basic understanding of sports before taking this class.

### **CW 2990 Hybridity Workshop**

Hybridity is an increasingly popular form of inventive language-based creative work where genres such as memoir and creative nonfiction, poetry, fiction, and visual images are blended to create cross-genre language-based meaning within a chosen constructed form. With a foundation that challenges conventional assumptions of form and content, hybridity asks both writers and readers to consider the threads that hold language together to create meaning.

### **HS 3990 History of Capitalism**

Few ideas have transformed the world over the last five hundred years quite like capitalism. In this course, we will investigate the economic, environmental, political, and social changes caused by the development, growth, and spread of capitalism around the world since the early modern period. Our approach will be

experiential and interdisciplinary and interrogate the inevitability and success of capitalism as an economic system, but also its consequences for human society.

### **LAS 1110 Food, Farms, and the Future**

This course is a seminar that explores one of the oldest and most essential intersections of humans and their environment: agriculture. The course will focus in particular on sustainability and local farming. A multidisciplinary course, it will explore the connections between agriculture and literature, arts, sciences, and history while looking to the uncertain future of farming. A strong emphasis is placed on the development of critical thinking and writing skills. It is designed to meet the LAS1110 requirements for new students

### **LAS 1110 Communicating Nature**

In *The Nature Principle*, author Richard Louv tells us: “The more high-tech we become, the more we need nature.” Does modern life allow us to be in tune with nature? In this high-tech world, how interdependent are we with other humans and the life supporting eco-systems around us? In *Communicating Nature*, author Julia B. Corbett looks to have us understand that all the message we have been fed through many forms of communication have helped to frame our view of nature. By exploring and analyzing the language used in discussions of the natural world as it streams to us from any sources: news outlets, conservation blogs and websites, poets, writer, corporate mission statement, documentaries, soundscape ecology, advertising images we can step back and look critically at our own beliefs. What does it mean to be “Human” within our natural world? This class looks to be a fun, dynamic, and interactive course! We need your participation to help make it great! Using a multi-disciplinary approach this class will engage readings, documentaries, and the exploration of the land itself, to better understand what it means to see ourselves as being a part of nature. To see ourselves as growing to care for the human fulfillment nature may provide. We will consider whether the idea that our rampant use of technologies has caused us to step further away from nature, further than at any other time in our evolutionary process. And is this even a concern to you?

### **LAS 1110 Will Climate Change My Life?**

As we enter the social and environmental disruptions of a rapidly changing climate, what is, and will be, the impact on you? This course is designed to help students understand a global environmental problem in the context of their own lives. To reach this point students will research and discuss the scientific method, climate research techniques, and the current predictions of climate change impacts on a global, national and regional scale. We will explore the inherent social issues of a global event including climate refugees, social justice, economic disruption, and cultural change and how these could impact students. Given a background in the current science, students’ final project will be to design a lifestyle concept map. It will serve as a visual framework of the impact of climate change on an individual, and an outline of behavior that could reduce greenhouse gasses and mitigate the impact of climate change

### **LAS 1110 Teasing Death with Adventure**

Why do humans feel the need to challenge themselves in the most dangerous conditions nature has to offer? is a central focus of this LAS 1 course. In this course the class will explore the psyche, development, and connection to nature of mountaineers, downhill bikers, backcountry skiing, and more. By developing a passion and connection to nature humans have sought to challenge the human body and the mind in pushing limits that can often result in tragedy and seemingly impossible survival. This course will also examine and attempt to understand the real fight or flight when survival skills are tested in the most critical situations. Students will reflect on literature and films that exemplify these human phenomena. The format of this course will include reading, films, reflection, journaling, discussion, and research. Students in this course will be expected to spend time outside. Students in this class will learn why humans, cross culturally, seek adventure and tease death in a natural environment utilizing minimal technology.

### **LAS 1110 Tigers, Trees and People**

Business, society, and the environment are connected in surprising ways with surprising results. In our interconnected world, each of us bears responsibility in building a sustainable future. This class looks at this interconnection and evaluates the ways business shapes outcomes for the environment and society. We will explore examples where business’ influence on the environment and society has been both positive and negative and attempt to draw out some conclusions. Many of the examples we will study are in countries across the globe; others are much closer to home. Finally, we will look at new structures and models of business being developed – innovations that allow us to simultaneously achieve business and societal goals without damaging the environment. Using real life examples, case studies, in-class exercises, and field trips, the class will see sustainability in action as well as learn about it. Building sustainable communities requires participation from all of us, and this class is your invitation to lead.

### **LAS 1110 Ethics and Capitalism**

Capitalism has been a powerful force in shaping the world as we know it. But has the output been morally good or bad? How do we weigh the opportunity afforded through the free-market with the marginalization, oppression, and pervasive inequality within the distribution of primary social goods? This course examines that very question by first exploring a normative ethical framework, upon which, to evaluate the morality of capitalism. After the normative theory and modeling is presented, recent trends within capitalism will be advanced to conduct an informed moral evaluation

### **LAS 1110 The Bear: Last of Humankind**

Using the book, *The Bear* by Andrew Krivak, students will explore the manner in which humans interact with the natural world in a fictional post-apocalyptic society. The book tells the story of a father and daughter living at the base of a bear-shaped mountain after the collapse of society. *The Bear* is NH’s Big Read, which is an initiative sponsored by New Hampshire Humanities Council, the New Hampshire Department of Cultural Resources, and over 40 libraries, schools, and bookstores

throughout the state. As part of the Big Read, students will have opportunities to develop activities based on the book and engage in the larger community.

**LAS 1110      Are We Living in the Matrix**

“The Matrix” raises the question: Is any of this real? Using “The Matrix” as a starting point, through philosophy, art and religion, the course examines humanity’s relationship to a nature which may or may not even be out there, and traces the implications for both alternatives. Along with covering other works of sci-fi that carry similar themes, the course examines the philosophers whose ideas were the inspiration for The Matrix, such as Socrates, Plato and Descartes. The main assignments will be project-based and will mirror real things that real people do in the real world (if there is one, that is). Students will gain competencies in understanding core philosophical concepts and their impact on humanity, nature, and the environment, explaining these concepts by adapting them to new audiences, and relating them to real-world issues and problems.

**LAS 1120      Justice and Capitalism**

Capitalism has been a powerful force in shaping the world as we know it. But have the outcomes been just? How do we weigh the opportunity afforded through the free market with the marginalization, oppression, and pervasive inequality within the distribution of primary social goods? This course examines that very question by surveying basic theories of justice, upon which, to evaluate the outcomes. Capitalism and some related economic concepts will be defined and will serve to hone our evaluation. Related literature, historical events, political theory, social stratification and our class system will also be items of study throughout the course.

**LAS 1120      Civil Rights & the Graphic Nvl**

Since the days of cave paintings and hieroglyphs, humans have been using the visual storytelling conventions of sequential art to recount and preserve their stories. In this course, we will read four graphic novels from four individuals of various race, religion, gender and sexual orientation to see how their experiences in American society compare and contrast with one another, as well as our own. In this course, we will read first-hand accounts from members of historically marginalized groups and examine how their experience of American freedom might not have afforded them the same human rights as others, and the means by which they’ve had to go about attaining equal rights in our democratic society. By viewing each of these unique experiences, we will also examine how the various cultures, religions, and communities that exist in the US work together to create our diverse American culture and society.

**LAS 1120      Sympathy For the Devil**

Have you ever gotten the chills watching a spider crawl on someone’s arm? What about winced in pain when someone else hit his or her forehead on a low-hanging beam? Have you ever identified with a fictional character’s struggle you read in a book? The spider wasn’t on your arm; the beam didn’t hit your forehead, and you’re not the character in the book. In each instance, however, you seemed to experience another’s suffering. That’s empathy, and whenever empathy is lacking, so, too, are

the capacity to see others as fully human and the values inherent to a democracy—impossible becomes the affirmation in Article 1 of The Universal Declaration of Human Rights that, “All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.” The recent groundswell of interest in empathy, however, may be due more to our growing unwillingness to understand and share the feelings of another, especially those unlike ourselves. Using an interdisciplinary approach, this course explores the critical role empathy plays in any Civic environment based upon democratic values and in solving increasingly complex societal ills as well as how literature can help us empathically "enlarge ourselves," as Richard Rorty puts it.

**LAS 3110      When Democracy Fails**

Working with the philosophical frameworks of Plato, Locke, Hobbs and Rousseau, this class will explore the fundamental elements of democratic theory and the strengths and weaknesses of democracy as a political ideal. Taking into account current struggles of people worldwide to establish democratic rule, a central question will be: once fought for and established, what are the issues that threaten democracy’s survival? Examples of historical failures of democracy, i.e., Athens, and Germany before the Nazi takeover, will be investigated in relation to current political/social movements, in order to gain some insight into how/why democracies can fail.

**PL 2990      Buddha & Socrates: On What is Real? – Course description coming soon**

**PO 2990      Trump’s America**

Donald J. Trump’s emergence as a figure on the political stage and his eventual election to the presidency in 2016 sent shockwaves around the globe. This course explores the factors that gave rise to Trump’s candidacy and presidency, examines the foundations and influence of the Make America Great Again movement in U.S. politics, and provides students with the tools and resources needed to understand contemporary political questions and controversies. Topics will include an analysis of Trump’s political worldview, demographic studies, political culture, social media, social and “culture war” issues, economic policy issues, and the political party system. The course will also consider the future of both Trump and the MAGA movement.

**PO 3990      Public Administration – Course description coming soon**

**PS 3990      Youth at Risk**

What makes an at-risk-youth? This class looks at developmental, environmental, social and physical/health issues that impact the life of children and influence the direction in which their lives may go. We will discuss relevant: Societal Factors, Family & School Issues, Suicide, Injuries, and Child Maltreatment. The course

will challenge your beliefs, ignite your curiosity and hopefully get you motivated to make a change in the life of a youth at risk.

**SM 3990 Sport & The Environment**

The sports industry goes beyond teams, fans, and games and works with and within the natural environment. Sport operators and consumers must be aware of the industry's environmental impact. Sport organizations are evaluating their environmental impact and promoting sustainable practices. Franchises, colleges, leagues, and venues continue to embrace environmental programs like renewable energy, recycling and zero waste endeavors, water conservation, sustainable purchasing, and other environmentally conscious practices. Sport can also be used to influence public perceptions about conservation and sustainable practices.

This course includes a holistic examination of the relationship between sport organizations and the natural environment, as well as environmental management in the sport industry. Students will gain an understanding of the impact sport has on the environment and the components of a successful environmental sustainability program through in-class discussions, case studies, and practical exercises.
