

New England
College

2024 SPRING

FINAL Course Schedule
Henniker January 29–May 16

updated 1.26.24

Spring 2024 Semester

January 29 (Monday)	Classes begin
January 31 (Wednesday)	Last day to Add or Drop - 1 st 7 week course
February 2 (Friday)	Last day to Add or Drop - full term course Last day to file Intent to Graduate (current term)
February 9 (Friday)	Last day to file Pass/No record - 1 st 7 week course
February 23 (Friday)	Last day to file Pass/No record - full term course
February 28 (Wednesday)	Last day to Withdraw from 1 st 7 week courses
March 1 (Friday)	Last day to finish Incompletes for Fall & Winter term
March 17 (Sunday)	1 st 7 week courses end
March 18 – 29 (Mon - Fri)	Spring Break
April 1 (Monday)	First day of 2 nd 7 week courses
April 3 (Wednesday)	Last day to Add or Drop - 2 nd 7 week courses
April 5 (Friday)	Last day to file Pass/No record – 2 nd 7 week course Last day to petition Pass/No record to grade Last day to Withdraw – full term course (Fall)
April 24 (Wednesday)	Last day to Withdraw – 2 nd 7 week course
May 16 (Thursday)	Last day of Spring term (full and 2 nd 7 weeks)
May 18 (Saturday)	Commencement

EXPLANATION OF CLASS DAYS/TIMES

M = MON. T = TUES W = WED R = THURS F = FRI

Military Time to Standard AM - PM Time

Military	Standard	Military	Standard
0800	8:00 AM	1500	3:00 PM
0900	9:00 AM	1600	4:00 PM
1000	10:00 AM	1700	5:00 PM
1100	11:00 AM	1800	6:00 PM
1200	NOONTIME	1900	7:00 PM
1300	1:00 PM	2000	8:00 PM
1400	2:00 PM	2100	9:00 PM

EXAMPLES

Class meets:

0900-1110 MW	(Mon & Wed from 9:00 am to 11:10 am)
1210-1320 MWF	(Mon & Wed & Fri from 12:10 pm to 1:20 pm)
0950-1130 T	(Tuesday from 9:50 am to 11:30 am)
1300-1450 TR	(Tues & Thurs from 1:00 pm to 2:50 pm)
1830-2100 R	(Thursday from 6:30 pm to 9:00 pm)

IMMERSION COURSES

Courses designated as *Immersion Courses* have a face-to-face required element, some of which occur over part or all of spring break. These include courses that have a travel away component and courses that have experiential, project based components. You may **sign up for only one Immersion course for travel outside of New England**. Some or all of the required incremental costs of the travel and experiential components will be subsidized by the college.

Spring 2024 Immersion Offerings:

LAS 3110 (1813) Education & Perspectives: Power of Storytelling (Scotland)
PO 2990: Politics of the Civil Rights Movement (Mississippi)

More information on this term's Immersion courses can be found in the course descriptions following the course schedule!

How to Register on MyNEC

Log in to MyNEC (<https://www.nec.edu/info-for/student-faculty-and-staff-resources/academic-resources/#MyNEC>)

- Click on “Student Services & Financial Aid”
- Click on “Registration”
- Click on “Add/Drop Classes”
- Choose the correct term- Spring 2024 Semester
- Enter CRN numbers and hit “Submit Changes”
If you need to find an additional class, click on “Class Search”.
- To see all of the classes offered, click on the top “Subject”, drag through the list. You can then refine your search to look by department, LAS requirement, etc.
 - Click on “Course Search”
 - This will bring up all of the class offerings for the term.
 - NOTE: Classes that are at the 5000-level or above are graduate courses and you may not sign up for them.
 - Closed classes have “C” on the left, open classes have box.
 - To sign up for the class, click on the box and a check will be inserted.
 - Click on “Register” at the bottom of the page.
 - If the class will work with your schedule, it will be added.
 - If there is a problem (time conflict, prerequisite) you will see a red error box.
- To confirm you are registered, return to the Registration Menu and select “Student Detail Schedule.”

SPRING 2024 COURSE DESCRIPTIONS NOT FOUND IN CATALOG

Residential Undergraduate Catalog: <https://catalog.nec.edu/>

AHT 3990 Histry of Narrative Cmmrcel Art

AR 2990 Sp Tp: Visualizing Cont. Issue

Contemporary art, as we experience it in galleries, museums and online includes more and more multi-medium/multi-media approaches and visualization of concepts and ideas. The default method of working in many mediums starts with the prescribed or chosen medium (painting, photography, printmaking, etc.) and only then the artist is called to express their chosen topic/concept and solve the visual problem within the medium's boundaries and capabilities.

“Special Topics: Visualizing Contemporary Issues” will attempt to reverse this equation and to encourage the students to experiment in any medium or art-form they desire for each assignment and topic. The class will introduce current issues that are widely explored and expressed in contemporary art across many different mediums. Each topic will be presented to the students through a lecture, prescribed readings with class discussion and a unique assignment that will propel the student to find the appropriate medium to express their idea/point of view regarding the discussed topic. Every assignment will be followed with in depth critique/discussion.

AR 3990 Printmaking Through Photographic Methods

This Class will combine techniques and concepts of both printmaking and photography to create exciting new works of art. Printmaking and photography have been linked since photography's invention in the 1820s. We will look at these historical printing techniques with contemporary concepts together to make work for today's world. The class will have both digital and analog components combined in diverse ways to expand student's toolbox.

AR 3990 Sp Tp: Community Mural Art

Mural painting is a historic and time-honored context for artists to convey ideas and imagery to a wide audience- creating images on a large scale, in a public location, and for a relatively larger public. The course will engage students in the entire process of approaching and working with public and private clients who are sponsoring or commissioning hypothetical, and when possible, actual murals for the class to execute. Students will develop proposals and scale models to be submitted to clients for review and approval, and will practice the processes and skills involved in the execution of approved commissions.

BI 2990 No Oceans, No Us

This course will explore why and how the world's oceans and their myriad inhabitants are responding to changes in Earth's environment. From rising sea levels and climate refugees to resource harvesting practices and the loss of ecosystem services, "No oceans, no us" will introduce you to factors that are

influencing the vitality and sustainability of Earth's marine communities. Importantly, you will be encouraged to seek innovative solutions to resolve issues pertaining to the marine environment that span different spatial and temporal scales. Accordingly, this course will highlight why an inter-disciplinary approach—a perspective that draws from the biological, environmental, and political sciences as well as the fields of business, education, human potential, and traditional ecological knowledge—is critical if we are to ensure the survival of the numerous species that depend on the sea, including our own. 4 credits

BU/PP 2990 Shark Tank NEC Prep & Practice

This course is designed to prepare students to compete or participate in the annual NEC Shark Tank pitch competition. Students will learn how to prepare a sales pitch for an organization or a business idea, and how to prepare for an event such as NEC Shark Tank. This class provides skill-building in developing and presenting new concepts together with practical experience in event preparation and management. Students in the class are expected to present their final project (and/or help out) at the 2023/24 NEC Shark Tank Pitch competition. This class is open to students from all majors and disciplines.

CH 2990 Forensic Science

This course will cover topics in forensic science, including applying the scientific method to forensic analysis; the practice and principles of crime scene investigation; and the proper handling of physical & trace evidence. Students will gain experiential knowledge of forensic science through laboratory experiments. Experiments will range from fingerprint and blood analysis to techniques that are based on genetic and chemical analysis of samples. This course fulfills the LAS 5 requirement.

CJ 2990 Drugs in America

This course is designed to assist students with understanding the Criminal Justice system's role in finding solutions to America's substance abuse problem. The primary focus of this class is for students to have an understanding of which drugs (both street and pharmaceutical) are being misused and what the Criminal Justice system and society is doing to combat it. Students will explore the efficacy of standard enforcement measures verses newer tactics that work to treat addiction before incarceration, such as decriminalization measures, drug courts and diversion.

CJ 2990 Learn, Earn, and Advance

This 4-credit course will serve as the means for a student to complete their degree at New England College, earn an income while attending college, and become engaged in the operations of a law enforcement organization. Students that complete this course will have an accelerated “inside edge” of earning additional employment opportunities at an in-State agency in the CJ system. The student will learn about the recruitment and selection process, agency on-boarding and training, and employment related skills. This course will also provide the student with the ability to enhance their interviewing and networking skills, and to attain certain Certifications as part of the agency training process. An example of a pathway with

this type of engaged learning would be advancing from a PT Police Dispatcher to a FT Police Officer at the same department post degree-completion.

Prerequisites: *CJ-1110/Intro to Criminal Justice, a valid driver license and reliable transportation, and the ability to pass a modified background and records check for employment.*

CO 3990 Topics: Broadcast Writing II

Broadcast Writing II will build on the structures taught in Broadcast Writing I. There will be a review of the four major foundations taught in the first class and they will be expanded into more deadline-oriented writing. Broadcast Writing II will also focus on the moral dilemmas that often occur when producing a news cast and how to treat 'sensitive' stories. Emphasis will be given to the more creative and feature driven style of broadcast writing. Students will critique news stories and news casts to understand what works and what doesn't when it comes to broadcast writing. Students will learn how to use sound and video to tell stories. Broadcast Writing II will emphasize speed and attention to detail under deadline pressure, much like a real-world newsroom. Prerequisite: CO 3990 Broadcast Writing I

CT 5990 Intro to AI

Develop a basic understanding of the technologies behind Artificial Intelligence with this introduction to AI research, techniques, and applications. Explore AI's foundational components that include data, machine and deep learning, and algorithms. Learn about how natural language processing, computer vision, robots, and agents are leveraged in AI solutions. Last, examine the use of AI in consumer and business applications, as well as ethical considerations. The course provides a foundation for more advanced study of AI.

EN/PL 2990 Madness and Memory in Literature

This course examines the concepts of madness and memory in literature and asks students to explore the interconnectedness of the two both thematically and structurally. We will examine works of fiction, non-fiction, and poetry (both short and long form) in pursuit of these themes and how they manifest on the page. Authors to be examined will include (but are not limited to) Anthony Burgess, Kazuo Ishiguro, Ken Kesey, Benjamin Labatut, Yoko Ogawa, Mary Ruefle, Joy Williams, and Virginia Woolf. This is a reading intensive course that meets the Literary Movements requirement for Creative Writing and the Interpretive Experience requirement for Philosophy and Literature.

HS 2990 Public History

Coming Soon

KI 2990 Theory of OE & Ropes Crse Mgt

This course examines the theoretical basis of experiential and outdoor education including the education, psychological, and historical underpinnings. Time spent in this course is spent in classroom setting and on the ropes course. Emphasis is given to each students philosophical development of leadership and education. The theories of outdoor education and leadership are researched, explored, and

discussed in this course. The course also explores and experiments how Ropes Courses are Educational and Therapeutic tools used in programming for developing efficacy, communication, and team building. Students will participate in extensive group experience. Successful completion of this course prepares students to design and lead experiential education activities both indoors and out. Prerequisites: KI 1110 or SM 1510 or ED 1000 , Minimum of 24 credits earned *Offered every spring Credits: 4*

LAS 1110 Are We Living in The Matrix?

“The Matrix” raises the question: Is any of this real? Using “The Matrix” as a starting point, through philosophy, art and religion, the course examines humanity’s relationship to a nature which may or may not even be out there, and traces the implications for both alternatives. Along with covering other works of sci-fi that carry similar themes, the course examines the philosophers whose ideas were the inspiration for The Matrix, such as Socrates, Plato and Descartes. The main assignments will be project-based and will mirror real things that real people do in the real world (if there is one, that is). Students will gain competencies in understanding core philosophical concepts and their impact on humanity, nature, and the environment, explaining these concepts by adapting them to new audiences, and relating them to real-world issues and problems.

LAS 1110 Communicating Nature

In The Nature Principle, author Richard Louv tells us: “The more high-tech we become, the more we need nature.” Does modern life allow us to be in tune with nature? In this high-tech world, how interdepend are we with other humans and the life supporting eco-systems around us? In Communicating Nature, author Julia B. Corbett looks to have us understand that all the message we have been fed through many forms of communication have helped to frame our view of nature. By exploring and analyzing the language used in discussions of the natural world as it streams to us from any sources: news outlets, conservation blogs and websites, poets, writer, corporate mission statement, documentaries, soundscape ecology, advertising images we can step back and look critically at our own beliefs. What does it mean to be “Human” within our natural world? This class looks to be a fun, dynamic, and interactive course! We need your participation to help make it great! Using a multi-disciplinary approach this class will engage readings, documentaries, and the exploration of the land itself, to better understand what it means to see ourselves as being a part of nature. To see ourselves as growing to care for the human fulfillment nature may provide. We will consider whether the idea that our rampant use of technologies has caused us to step further away from nature, further than at any other time in our evolutionary process. And is this even a concern to you?

LAS 1110 End of the World As We Know It

This course will explore how American culture sometimes labels various events or processes as cataclysm or apocalypse. First, we will examine how chattel slavery combined with cotton culture to change the landscape of America, culminating in the cataclysmic American Civil War. Next we will explore the role of natural

disaster and end-of-the-world scenarios in popular culture and ask how this might affect how we deal with the reality of climate change or nuclear holocaust. Finally, we will consider how our political culture has come to grips with the possibility of the apocalyptic predictions of climate change in the near future.

LAS 1110 Ethics and Capitalism

Capitalism has been a powerful force in shaping the world as we know it. But has the output been morally good or bad? How do we weigh the opportunity afforded through the free-market with the marginalization, oppression, and pervasive inequality within the distribution of primary social goods? This course examines that very question by first exploring a normative ethical framework, upon which, to evaluate morality. Capitalism and some related economic concepts will be defined and will serve as the focus of the moral evaluation. Related literature, historical events, political theory, recent organizational trends, and sociological phenomena will also be included within the evaluation.

LAS 1110 Will Climate Change My Life?

As we enter the social and environmental disruptions of a rapidly changing climate, what is, and will be, the impact on you? This course is designed to help students understand a global environmental problem in the context of their own lives. To reach this point students will research and discuss the scientific method, climate research techniques, and the current predictions of climate change impacts on a global, national and regional scale. We will explore the inherent social issues of a global event including climate refugees, social justice, economic disruption, and cultural change and how these could impact students. Given a background in the current science, students' final project will be to design a lifestyle concept map. It will serve as a visual framework of the impact of climate change on an individual, and an outline of behavior that could reduce greenhouse gasses and mitigate the impact of climate change.

LAS 1120 Civil Rights and Star Trek

Launched amidst the civil rights movement of the 1960's, Star Trek boldly went where no other TV show had gone before by placing a black female officer on the bridge crew of Starfleet's flagship vessel, and rightly earned its place in our nation's civil rights history. From the 1960's to today, Star Trek continues to explore issues of race, gender, sexual orientation, and civil rights through the lens of science fiction, holding a mirror to our own society's issues. In this course, you'll watch a lot of Star Trek, and that will be a lot of fun, but you'll also learn about the struggles for civil rights and what constitutes the nature of humanity and personhood.

LAS 1120 Exp America Balance Land Mgt

Experience your America: The balance, controversy, and importance of national land management. This course comes on the back side of the National Parks Service Centennial and major land protests. How does the government impact the land that we have set aside to preserve, enjoy, explore, and more? This course is an exploration into the history of Land management from both a political and outdoor perspective. The many facets of land management will be used as the basis for

discussion, debate, and research. The experiential component during this course will be a group project that serves, researches, or explores land set aside for public use.

LAS 1120 Sympathy for the Devil

Have you ever gotten the chills watching a spider crawl on someone's arm? What about winced in pain when someone else hit his or her forehead on a low-hanging beam? Have you ever identified with a fictional character's struggle you read in a book? The spider wasn't on your arm; the beam didn't hit your forehead, and you're not the character in the book. In each instance, however, you seemed to experience another's suffering. That's empathy, and whenever empathy is lacking, so, too, are the capacity to see others as fully human and the values inherent to a democracy—impossible becomes the affirmation in Article 1 of The Universal Declaration of Human Rights that, "All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood." The recent groundswell of interest in empathy, however, may be due more to our growing unwillingness to understand and share the feelings of another, especially those unlike ourselves. Using an interdisciplinary approach, this course explores the critical role empathy plays in any Civic environment based upon democratic values and in solving increasingly complex societal ills as well as how literature can help us empathically "enlarge ourselves," as Richard Rorty puts it.

LAS 3110 Education & Perspective: The Power of Storytelling

Education, as a fundamental right and a cornerstone of both individual and societal development, is deeply intertwined with cultural, traditional, and identity-based elements. This course delves into the complex intersections of these factors within academic systems both on a domestic and international scale. Many societies use storytelling as a role in transmitting folklore, history, and cultural values, often stemming from a diverse range of regional influences. This course measures the complexity and extent to which culture and history can impact educational policy reforms. Through critical analysis and reflection, students will embark on a journey to develop intercultural competence, nurturing an appreciation for human diversity, fostering curiosity, and strengthening human connections. Other topics of exploration include culture and identity influences, comparative education models, storytelling as a medium, and addressing complex social issues through the lens of education. This intensive writing course has an immersive travel component. Prerequisites: LAS 1, LAS 2, LAS 3, LAS 4, LAS 5

LAS 3110 Storytelling as Research

This course will examine narratives, both historical and current, to analyze and reflect on local and global issues pertaining to civic engagement and the natural environment. Students will have the opportunity to explore how storytelling can help to promote the common good by allowing individuals to share their lived experiences. Students will practice narrative inquiry by writing their own narratives. Additionally, students will have the opportunity to read global narratives in order to draw connections between the responsibilities humans have to their local civic and natural environments, and their responsibility to global concerns of democratic

freedom, human rights, and the natural environment. Students will use what they have learned within their individual disciplines to connect to the greater understanding of the interrelationship between disciplines.

NU 1990 Licensed Nursing Assistant

NEC offers this course through an academic-practice partnership with LNA HealthCareers. Nursing instructors from LNA HealthCareers will prepare students as Licensed Nursing Assistants (LNA). Students in this course will acquire the knowledge and skills to prepare for the New Hampshire Board of Nursing Nurse Assistant exam. The course consists of 110 hours of training (50 classroom hours and 60 hours in clinical settings). This course provides 4-credits toward the completion of the Three-Year Cooperative Nursing Bachelor of Science in Nursing Program.

Credits: 4. Course Fee: \$2,400.00.

Students must be free from felony convictions, meet all health requirements, purchase NEC scrubs, and pay a required course fee that covers the course, criminal background checks and fingerprinting, and LNA examination fees.

PE 1990 Pickleball

This is a one-credit course designed to give the student a basic background in the game of pickle ball. This course will include instruction of the basic rules, techniques and skills needed to play pickle ball at any level. The student will also learn the mental and physical benefits of participation in pickle ball as a lifetime sport. No previous pickle ball skills are necessary.

PL 2990 When the Joke Becomes Reality: Satire, Rhetoric, and Social Change

Satire. Whether it's lighthearted and funny or sarcastic and acerbic, one thing satire is not is powerless. Effective satire is a rhetorical device; it persuades us to see the world differently. In *When the Joke Becomes Reality: Satire, Rhetoric, and Social Change* students will not only learn about and analyze early and contemporary examples of satire; they'll leverage those analytical skills to improve upon their own persuasive writing abilities. Students will likewise lean into their own satirical temperaments, composing projects that use satire to comment upon groups, behaviors, and institutions in an effort to persuade their audience to think differently about their worlds.

PO 2990 Politics of the Cvl Rghts Mvmt

The Politics of the Civil Rights Movement will take students to Tennessee and to Mississippi, the latter of which has been described by scholars as ground zero for the battle for civil rights and equality in America. The late Congressman John Lewis was jailed for using a "whites only" restroom in the state and later said that while other parts of the Deep South were a struggle for civil rights, Mississippi was pure hell. The Magnolia State has come a long way since the days of Jim Crow, segregation, and John Lewis' early activism. This class will directly engage with civil rights leaders, activists, and change-making historical figures who fought—

and continue fighting—for civil rights and equality in the nation. Students will engage with individual actors and leaders from yesterday and today who were instrumental in the quest for civil rights. They will also visit numerous museums, historical sites, and cultural landmarks that shaped the civil rights movement both yesterday and today.

PP 2990 Intro to Insurance & Risk Mgmt

This course introduces students to the nature of risk, risk identification, general risk management techniques, and the management of risk through insurance. It covers why the individual or corporation purchases insurance, what constitutes an intelligent insurance plan, what products are available in the insurance marketplace, and how those products are regulated.

PS 4990 Applied Behavioral Analysis

An examination of the factors to be considered in observing and measuring behavior and environment; methods of recording data with emphasis on the conditions under which each method is most appropriate. An overview of strategies and tactics of experimental design in behavior analysis. Includes strengths and weaknesses of single-subject methodology in basic and applied research.

SM 2990 Theory of OE & Ropes Crse Mgt

This course examines the theoretical basis of experiential and outdoor education including the education, psychological, and historical underpinnings. Time spent in this course is spent in classroom setting and on the ropes course. Emphasis is given to each students philosophical development of leadership and education. The theories of outdoor education and leadership are researched, explored, and discussed in this course. The course also explores and experiments how Ropes Courses are Educational and Therapeutic tools used in programming for developing efficacy, communication, and team building. Students will participate in extensive group experience. Successful completion of this course prepares students to design and lead experiential education activities both indoors and out. Prerequisites: KI 1110 or SM 1510 or ED 1000 , Minimum of 24 credits earned *Offered every spring Credits: 4*
