AR 1990 Art & Business in Action: Community Mural Project
This is a unique opportunity to be involved in the planning and execution of a large-scale collaborative 10-day community mural project. Whether you're a graphic designer, fine artist, or business creative, your skills will be refined as you learn to create a brand, and apply the principles of business planning, marketing, fundraising, event planning and strategy to achieve common goals. Students will be able to serve as assistants to professional mural artists or work as on-site coordinators. Learn the ins and out of the art industry as you help bring art to life!

HS 2990 Hands-On History
History is not just what you read about in dusty old tomes pulled from library stacks. History is alive and all around us at all times. In this class, we will experience history as it is interpreted and remembered here in New England, and consider the challenges and opportunities in presenting history to the public for their consideration and edification. Travel is required.

LAS 1110 Are We Living in the Matrix
"The Matrix" raises the question: Is any of this real? Using "The Matrix" as a starting point, through philosophy, art and religion, the course examines humanity's relationship to a nature which may or may not even be out there, and traces the implications for both alternatives. Along with covering other works of sci-fi that carry similar themes, the course examines the philosophers whose ideas were the inspiration for The Matrix, such as Socrates, Plato and Descartes. The main assignments will be project-based and will mirror real things that real people do in the real world (if there is one, that is). Students will gain competencies in understanding core philosophical concepts and their impact on humanity, nature, and the environment, explaining these concepts by adapting them to new audiences, and relating them to real-world issues and problems.

LAS 1110 Ethics and Capitalism
Capitalism has been a powerful force in shaping the world as we know it. But has the output been morally good or bad? How do we weigh the opportunity afforded through the free-market with the marginalization, oppression, and pervasive inequality within the distribution of primary social goods? This course examines that very question by first exploring a normative ethical framework, upon which, to evaluate the morality of capitalism. After the normative theory and modeling is presented, recent trends within capitalism will be advanced to conduct an informed moral evaluation

LAS 2140 Barbie: More Than Just a Doll
This course will provide students with an in depth look at Barbie as more than just a doll. How could 11.5 inches of plastic, weighing a mere 18.4 ounces become an international icon influencing art, pop culture, fashion, gender roles, body image, race, family values, and more? Can a doll really be this powerful? This course will include optional synchronous Zoom discussions.

PL 2990 Lit Ideas
Philosophy analyzes the core questions of what it means to be human. Unfortunately, the responses returned are often more difficult to understand than the questions themselves, and, at times, of life itself. In this course, we will use literature to chase answers to some of the questions that have been evading philosophical resolution for millennia. Why use literature? Literature does not attempt to trap or contain that which is beyond human understanding; literature assumes our "unhandsome condition" as a starting point. We are afforded only temporary stays through literature, upon which, to catch a fleeting glimpse into our vital questions, e.g. "Is there a purpose somehow lurking out *there*?", "Do you have to be evil to get ahead in this world?", "Is justice a childish outdated myth?", "Why is suffering woven into the fabric of our existence?", "Who am I?", "Will I or some part of me survive my death?"

SM 3990 Sport & the Environment
The sports industry goes beyond teams, fans, and games and works with and within the natural environment. Sport operators and consumers must be aware of the industry's environmental impact. Sport organizations are evaluating their environmental impact and promoting sustainable practices. Franchises, colleges, leagues, and venues continue to embrace environmental programs like renewable energy, recycling and zero waste endeavors, water conservation, sustainable purchasing, and other environmentally conscious practices. Sport can also be used to influence public perceptions about conservation and sustainable practices.
This course includes a holistic examination of the relationship between sport organizations and the natural environment, as well as environmental management in the sport industry. Students will gain an understanding of the impact sport has on the environment and the components of a successful environmental sustainability program through in-class discussions, case studies, and practical exercises.
