

BACKGROUND INFORMATION

In compliance with RSA 188-H, which requires all New Hampshire colleges and universities to conduct a survey on campus climate regarding sexual misconduct, New England College distributed this survey to all students during the spring 2026 semester. The survey instrument was developed by a state-wide task force. The survey was open from January 26 to March 15, 2026.

All enrolled students (undergraduate and graduate, face-to-face or online) as of January 20, 2026, were sent an email with a direct link to access the survey. Five reminder emails were issued to the students who had not yet completed the survey as of January 29, February 5, 11, 17, and 25, 2026. All emails were sent to the students' NEC email addresses. Of the 3,730 students who received the survey link, 517 started the survey and 517 completed it (100% completion rate). These results correspond to a 14% response rate.

The students were asked a wide variety of questions, the responses to which are presented in the upcoming sections of this report. Questions were broken into the following blocks: demographics, perceptions of campus climate regarding sexual misconduct, sexual harassment by students, stalking victimization, dating violence victimization, sexual violence victimization, sexual harassment by faculty/staff, institutional responses, and campus safety.

In order to encourage participation, New England College offered incentives to students who completed the survey. Via random draw, two students received \$100 Amazon gift cards and one student received a \$200 Amazon gift card.

Questions about this survey or its results may be directed to Dr. Matt Khoury, Director of Student Conduct and Deputy Title IX Coordinator at mkhoury@nec.edu or 603-428-2318.

DEMOGRAPHICS

In this block of questions, students were asked to answer the following demographic questions about themselves. In order to protect the identity of participants, any response groups with less than or equal to 5 participants are listed as ≤ 5 and not included in totals or percentages. Whenever possible, information about the overall NEC population is presented beside the participant results for comparison.
