M = MON. T = TUES W = WED R = THURS F = FRI

Military Time to Standard AM - PM Time

Military	Standard	Military	Standard
0800	8:00 AM	1500	3:00 PM
0900	9:00 AM	1600	4:00 PM
1000	10:00 AM	1700	5:00 PM
1100	11:00 AM	1800	6:00 PM
1200	NOONTIME	1900	7:00 PM
1300	1:00 PM	2000	8:00 PM
1400	2:00 PM	2100	9:00 PM

EXAMPLES

Class meets:

0900-1110 MW	(Mon & Wed from 9:00 am to 11:10 am)
1210-1320 MWF	(Mon & Wed & Fri from 12:10 pm to 1:20 pm)
0950-1130	(Tuesday from 9:50 am to 11:30 am)
1300-1450 TR	(Tues & Thurs from 1:00 pm to 2:50 pm)
1830-2100 R	(Thursday from 6:30 pm to 9:00 pm)

How to Register on MyNEC

- Log in to MyNEC (<http://www.nec.edu/students-faculty-staff/>)
- Click on “FERPA Declaration, Student Services & Financial Aid”
- Click on “Registration”
- Click on “Add/Drop Classes”
- Choose the correct term- Fall 2021 Semester
- Enter CRN numbers and hit “Submit Changes”
If you need to find an additional class, click on “Class Search”.
- To see all of the classes offered, click on the top “Subject”, drag through the list. You can then refine your search to look by department, LAS requirement, etc.
 - Click on “Course Search”
 - This will bring up all of the class offerings for the term.
 - NOTE: Classes that are at the 5000-level or above are graduate courses and you may not sign up for them.
 - Closed classes have “C” on the left, open classes have box.
 - To sign up for the class, click on the box and a check will be inserted.
 - Click on “Register” at the bottom of the page.
 - If the class will work with your schedule, it will be added.
 - If there is a problem (time conflict, prerequisite) you will see a red error box.
- To confirm you are registered, return to the Registration Menu and select “Student Detail Schedule.”

FALL 2021 COURSE DESCRIPTIONS NOT FOUND IN CATALOG

Residential Undergraduate Catalog: <http://catalog.nec.edu/index.php>

AC 2990 Survey of Accounting

This introductory course has been designed for non-business majors. The goal is to introduce the topic of accounting in a way that will enable further study. Early in the term we will attempt to grow the student's awareness of terms and concepts related to the general concept of "what is accounting for". The eventual goal is to enable an understanding of the facts that come from financial statements and how they will impact the management decisions the company is obligated to make.

BU/SM 3990 Sport Media

This course examines the role media plays in contemporary sports, the relationship between sport and sport media, and how these two entities influence the public's perception of the sport's industry. Many professional careers associated with sport media will be discussed including sports information, public/media relations, journalism, and broadcasting. Students will learn how to conduct interviews with sports figures, create media and promotional materials, write game and feature stories, and to effectively utilize social media as a promotional tool.

CJ 2990 Crime Analysis

This course will cover the basic functions of crime analysis in modern policing. Based upon the high technical nature of crime analysis this class -will be taught online as many requests are sent via electronics means and while crime analysis roots lie without computer assistance, it has evolved into an essential tool. Students taking this class will be required to discuss basic topics in criminal justice and have a solid understanding of basic mathematics. Perquisites for this class should be Introduction to Criminal Justice and a waiver for math 990 or completion of a college level mathematics class. The course will require the use of discussion groups on a regular basis along with collaboration between students as the field of crime analysis requires collaboration with other people in the department and colleagues. Students will be required to have a current copy of Microsoft office, including Word, Excel and Access. The course will cover 3 primary areas of crime analysis: Sources of data, analysis and products produced in crime analysis.

CJ 2990 Juvenile Justice

This course provides a detailed overview of the history and development of the Juvenile Justice system and Juvenile Law in the United States. We will examine the history of the juvenile court system and its effect on current policy. The course will provide a detailed study of the judicial process involved today in the handling of juvenile matters from a police, prosecutor and societal perspective. Special emphasis will be placed on the judicial aspects involved in a juvenile case, including charging, custody issues, court process, treatment and after-care.

CJ 3990 Organized Crime

This course concerns itself with the history, structure, and mission of various types of organized criminal enterprises. It will offer a detailed analysis of the structure and methods of operation of both domestic and transnational crime groups. Topics will include Prohibition, drug trafficking, gambling, loan sharking, contract murder and an analysis of the different ethnical crime families. Current law enforcement practices and policy issues will be discussed.

CJ 3990 Interviewing and Interrogation

This course provides an in-depth examination of interpersonal communications with a specific focus on interviews conducted by law enforcement, including victim, witness, informant, and subject interviews. Emphasis is placed on rapport-based interviewing techniques; developing effective questioning strategies; identifying, managing, and avoiding common forms of resistance; adapting to intercultural situations; and identifying and managing deception. Each component of the course is backed by the most recent academic research in the field. Prerequisites: CJ 1110, CJ 2130.

ES 2990 Tp: Community Action on Climate Change

This course is designated for face to face students only

In this course, students will learn the science of climate change and become familiar with the state, federal, and international policies focused on addressing this global challenge. Students will work with community members who are active in the Kearsarge Climate Action Committee to develop education and outreach materials that can be used during community presentations at local libraries. These presentations will use local stories and examples to illustrate how climate change is impacting our community's ecosystems and economies and will encourage civil discourse and democratic debate about local and national policy decisions around climate change. During the laboratory portion of the course, students and community members will engage in citizen science projects focused on documenting how climate change is affecting local ecosystems and economies.

ES 3990 Tpcs: Water Resrcs and Quality

The principles of water quality and physicochemistry are examined in the context of EPA water quality standards and mitigating the impacts of water pollution on ecosystems and human health. The fundamentals of water resource planning and hydrology are explored with emphasis on management of community water resources. Case studies of major water quality issues are studied including lead contamination, harmful algal blooms, surface water quality and groundwater contamination. Completion of ES3300 Research Methods is recommended but not required. Prerequisites: ES 1110, MT 2300, CH 2010 or CH2110 (4 Credits)

KI 2990 Cert Prep: Personal Training

This course will provide instruction, both lecture based and practical, to prepare students to earn a Certified Personal Trainer (CPT) certificate. There are several reputable organizations that offer a similar certification; this course will prepare

students to sit for the test offered by the organization of their choice. Topics will include introductory level instruction in:

- Anatomy and Kinesiology
- Exercise technique
- Exercise testing
- Exercise physiology
- Nutrition
- Basic biomechanics
- Behavior modification
- Client screening and interaction
- Exercise programming
- Legal issues
- Facility Standards
- CPR/AED/First Aid

LAS 1110 ANTHROPOCENE Age of Man

Humans (*Homo sapiens*) have inhabited the Earth only last 150,000 years. This is a blink of an eye compared to the age of the Earth of 4.5 billion years. Yet, this species has spread over most of the planet and profoundly affected its ecosystem. In this course we will consider the positive and negative impact of the human activities from the philosophical, ethical and scientific understanding of the relationship between man and the nature. Emphasis will be on the finding the way to minimize and mitigate any negative impact on the living Earth and pursue a sustainable way of living. The discussion will be based on the verifiable, reliable information and logical, rational reasoning.

LAS 1110 Communicating Nature

In *The Nature Principle*, author Richard Louv tells us: “The more high-tech we become, the more we need nature.” Does modern life allow us to be in tune with nature? In this high-tech world, how interdependent are we with other humans and the life supporting eco-systems around us? In *Communicating Nature*, author Julia B. Corbett looks to have us understand that all the message we have been fed through many forms of communication have helped to frame our view of nature. By exploring and analyzing the language used in discussions of the natural world as it streams to us from any sources: news outlets, conservation blogs and websites, poets, writer, corporate mission statement, documentaries, soundscape ecology, advertising images we can step back and look critically at our own beliefs. What does it mean to be “Human” within our natural world? This class looks to be a fun, dynamic, and interactive course! We need your participation to help make it great! Using a multi-disciplinary approach this class will engage readings, documentaries, and the exploration of the land itself, to better understand what it means to see ourselves as being a part of nature. To see ourselves as growing to care for the human fulfillment nature may provide. We will consider whether the idea that our rampant use of technologies has caused us to step further away from nature, further than at any other time in our evolutionary process. And is this even a concern to you?

LAS 1110 Ethics and Capitalism

Capitalism has been a powerful force in shaping the world as we know it. But has the output been morally good or bad? How do we weigh the opportunity afforded through the free-market with the marginalization, oppression, and pervasive inequality within the distribution of primary social goods? This course examines that very question by first exploring a normative ethical framework, upon which, to evaluate morality. Capitalism and some related economic concepts will be defined and will serve as the focus of the moral evaluation. Related literature, historical events, political theory, recent organizational trends, and sociological phenomena will also be included within the evaluation.

LAS 1110 Food, Farms, and the Future

This course is a seminar that explores one of the oldest and most essential intersections of humans and their environment: agriculture. The course will focus in particular on sustainability and local farming. A multidisciplinary course, it will explore the connections between agriculture and literature, arts, sciences, and history while looking to the uncertain future of farming. A strong emphasis is placed on the development of critical thinking and writing skills. It is designed to meet the LAS1110 requirements for new students.

LAS 1110 Relationship Status: It's Complicated

This course is a philosophical look at the evolution and deconstruction of the subject/object dichotomy between humanity and nature. Through our analysis of this problem, students will engage the thought of some of the most pivotal thinkers in the history of philosophy. The course opens in Ancient Greece at the dawn of the concept of “Nature” and philosophy’s initial attempt to gain dominion over an otherwise chaotic world ruled by the Gods. Through Socrates and Plato, students will trace the early history of humanity’s separation from nature via the soul/body dichotomy. After tracing the evolution of that dichotomy through the Middle Ages and the history of Christianity, the course turns to 17th century thinker, Rene Descartes, who formalizes it as the Subject/Object dichotomy for the modern era. Finally, through Martin Heidegger in the 20th century, students will engage in an existential analysis of our being-in Nature and our rootedness in the World, finally deconstructing the Subject/Object dichotomy and restoring our forgotten relationship between humanity and nature.

LAS 1110 Teasing Death with Adventure

Why do humans feel the need to challenge themselves in the most dangerous conditions nature has to offer? is a central focus of this LAS 1 course. In this course the class will explore the psyche, development, and connection to nature of mountaineers, downhill bikers, backcountry skiing, and more. By developing a passion and connection to nature humans have sought to challenge the human body and the mind in pushing limits that can often result in tragedy and seemingly impossible survival. This course will also examine and attempt to understand the real fight or flight when survival skills are tested in the most critical situations. Students will reflect on literature and films that exemplify these human phenomena. The format of this course will include reading, films, reflection, journaling, discussion,

and research. Students in this course will be expected to spend time outside. Students in this class will learn why humans, cross culturally, seek adventure and tease death in a natural environment utilizing minimal technology.

LAS 1110 Tigers, Trees, and People

Business, society, and the environment are connected in surprising ways with surprising results. In our interconnected world, each of us bears responsibility in building a sustainable future. This class looks at this interconnection and evaluates the ways business shapes outcomes for the environment and society. We will explore examples where business' influence on the environment and society has been both positive and negative and attempt to draw out some conclusions. Many of the examples we will study are in countries across the globe; others are much closer to home. Finally, we will look at new structures and models of business being developed – innovations that allow us to simultaneously achieve business and societal goals without damaging the environment. Using real life examples, case studies, in-class exercises, and field trips, the class will see sustainability in action as well as learn about it. Building sustainable communities requires participation from all of us, and this class is your invitation to lead.

LAS 1110 The Nature Principle

One of the most pressing challenges we face today is our relationship to the natural world. With more and more of our time spent in technologically mediated environments, our time in nature is seen primarily as recreational. As a result, our attentiveness to the land as a living community, and understanding our place within it, seems to be increasingly beyond our view. Using a multi-disciplinary approach this class will engage readings, documentaries, and the land itself, to better understand what it means to see ourselves as being *of nature*, not just in it. In doing so, we will consider whether the idea that becoming one with our machines/technologies is just another step in our evolutionary process, one that will allow us to completely transcend our very biology, placing us *beyond nature* in some way. We will begin, however, with a very different view. Richard Louv, author of *The Nature Principle*, believes that: "*The more high-tech we become, the more we need Nature.*" First question – What could he possibly mean?

LAS 1110 Understanding Our Place in Nature

This course gives students a multi-faceted view of the place of humanity in the web of life comprising the natural environment.

LAS 1110 Will Climate Change Change My Life?

As we enter the social and environmental disruptions of a rapidly changing climate, what is, and will be, the impact on you? This course is designed to help students understand a global environmental problem in the context of their own lives. To reach this point students will research and discuss the scientific method, climate research techniques, and the current predictions of climate change impacts on a global, national and regional scale. We will explore the inherent social issues of a global event including climate refugees, social justice, economic disruption, and cultural change and how these could impact

students. Given a background in the current science, students' final project will be to design a lifestyle concept map. It will serve as a visual framework of the impact of climate change on an individual, and an outline of behavior that could reduce greenhouse gasses and mitigate the impact of climate change.

LAS 1120 Civil Rights and the Graphic Novel

By reading and analyzing the stories of others, this course will allow us to examine the unique experiences of individuals of varying race, gender, sexual orientation and religious affiliation and see how their experience of society may differ from what we perceive in our own lives. This course will look at the way we perceive the society and culture we live in, and how our perceptions may differ from others, unlike ourselves, who live in that same society, and we will examine how our limited perspective may influence the way we treat and perceive others. From there, we will understand how the human rights—as defined by the Universal Declaration of Human Rights—of historically marginalized groups have not been respected, protected or preserved, and what recourse people have had to take in order to gain or defend their rights."

LAS 1120 Human Rights on the World Stage

The struggle for human dignity, justice, and freedom is universal and timeless; it recognizes neither cultural nor historical boundaries. From Sophocles' *Antigone* to the *Vanek Plays* of Vaclav Havel, theatre and film artists have persistently and forcefully rebelled against tyranny, oppression, and exploitation in all their forms. These themes will be explored through a variety of films and two live theatre productions

LAS 1120 The Humanity in Sports

Sport can be considered a microcosm of society because of its many different social issues that are also reflected in society at large. Examples include racism, gender inequity, social class exclusion, greed and corruption, diversity, and violence. However, when viewed as a culturally valued human practice (Arnold, 1992), sport can become a power vehicle for fostering important human values and beliefs such as fairness, respect, freedom, compassion, and democracy. Thus, the purpose of this class is to: 1) familiarize students with a variety of social issues that occur in sport as they relate to human rights, 2) examine these various issues through sociological and philosophical lenses, and 3) develop students' understanding of the "practice view of sport" which can in turn be used to appreciate the application of important moral and societal values.

LAS 1120 Voting Rights in America: A History of Struggle

We tend to think voting rights in America are pretty simple: everyone over 18 years old gets to vote, votes are counted the same way for everyone, and the candidate with the most votes wins. In practice voting in America is much more complicated. In this course we will explore the history of voting rights in America including the various struggles to expand the franchise to marginalized groups. Contemporary issues including redistricting, poll access, absentee and mail-in ballots, provisional ballots, residency requirements, voter ID laws, and polling technology will be discussed through the examples of recent elections.

LAS 3110 When Democracy Fails

Working with the philosophical frameworks of Plato, Locke, Hobbs and Rousseau, this class will explore the fundamental elements of democratic theory and the strengths and weaknesses of democracy as a political ideal. Taking into account current struggles of people worldwide to establish democratic rule, a central question will be: once fought for and established, what are the issues that threaten democracy's survival? Examples of historical failures of democracy, i.e., Athens, and Germany before the Nazi takeover, will be investigated in relation to current political/social movements, in order to gain some insight into how/why democracies can fail.

OE 1990 Leave No Trace Ethics

We enter the backcountry, wilderness, parks, and more and the familiar saying "Leave only footprints; take only memories" may come to mind. There is an ethic for how we spend time in the wilderness. Leave no Trace has seven principles that are easily understood and practiced by leaders and encouraged in National Parks, Forests, and more. This course is taught by a certified instructor and has the goal of helping people understand their impact on the land as well as how to minimize this impact. This is a great course for all people who spend time in nature.

PL 2990 Chasing Phil Thrhg Literature

Philosophy analyzes the core questions of what it means to be human. Unfortunately, the responses returned are often more difficult to understand than the questions themselves, and, at times, of life itself. In this course, we will use literature to chase answers to some of the questions that have been evading philosophical resolution for millennia. Why use literature? Literature does not pretend to understand these same questions completely or resolve these same questions "once and for all". Literature assumes our "unhandsome condition" as a starting point. We are afforded therefore only temporary stays, fleeting glimpses, into these vital questions. As Stanley Cavell has noted, the importance may not be so much in the finding as in the founding of our responses. Questions pondered might include the following: "Is there a purpose somehow lurking out there?"; "Do you have to be evil to get ahead in this world?"; "Is justice a childish outdated myth?"; "Why is suffering woven into the fabric of our existence?"; "Who am I?"; "Will I or some part of me survive my death?". This course satisfies the LAS 6 requirement.

PL 2990 Process in Literature and Philosophy

The question is not "What?" but "When is the meaning of life?" In this course, you will put your "Existential Detective" hat on to trace the influence of the 20'th Century school of thought known as Process Philosophy through literature and film. Using the lens of American philosopher Alfred North Whitehead, students will analyze two of the professor's favorite literary/film pieces, Walt Whitman's "Leaves of Grass" and David O. Russell's and Jeff Baena's "I Heart Huckabees" in order to gain an understanding of and appreciation for our shared connection with nature.
