"I absolutely recommend this program. We (students) say that this is the most doable program we've been able to find. The fact that it's an accelerated program is extremely helpful for people with a busy schedule who want to be done in a timely fashion but also need to balance it with a busy work schedule. The strength of the program are the faculty; they're supportive through every part of the process. And I think it's one of the most affordable programs in the country."
