College

2021 Winter

TENTATIVE Course Schedule

November 29th – January 23rd

updated 4.20.20

Winter Term 2021

November 29 (Monday)	Classes begin
December 1 (Wednesday)	Last day to add/drop
December 10 (Friday)	Last day to file Pass/No record
December 20-26 (Mon - Sun)	December Break (No Classes)
December 27-31 (Mon – Fri)	In person classes meet virtually
January 5 (Wednesday)	Last day to petition P/NR to grade Last day to Withdraw
January 17 (Monday)	Martin Luther King Jr Day – No classes, Offices closed
January 23 (Sunday)	Last day of Winter term

Information Regarding Student Housing and Tuition &
Fees
Coming Soon!

Winter 2021 Course Offerings

NEC is excited to be offering a mix of face to face and online courses of interest in our extended Winter term. Courses begin on November 29th and run through January 23rd, with a break the week of December 20th. Winter is a great time to get caught up or ahead from on campus or the comfort of your home.

For Winter 2021, students paying full time tuition will have the ability to take, between Fall and Winter term, up to 18 credits with no additional tuition charge.

How does that work?

If you were registered for classes in the Fall term, you can subtract the number of credits you took for Fall and any left up to 18 can be taken in the Winter term.

What if I took 16 credits in the Fall and I sign up for a 4 credit course in the Winter?

If you take 16 credits in the Fall, you would only pay for the credits over 18. For a 4 credit course, that would be 2 credits at the reduced Winter term tuition rate.

Do I need to do anything to apply the credits to my Winter bill?

No, your tuition for Winter term will automatically be adjusted based on your Fall enrollment.

Things to remember:

- Any withdrawn classes in the Fall semester will count towards the 18 credits covered by your full time tuition.
- Students who normally take an overload of 20 credits during the semester will need to take the full overload in the Fall term. Only credits not taken up to 18 in the Fall will be applied to Winter term.

For questions on how you may be able to cover the costs of a Winter term course, contact Student Financial Services at sfs@nec.edu.

WINTER 2021 COURSE DESCRIPTIONS NOT FOUND IN CATALOG

Residential Undergraduate Catalog: <http://catalog.nec.edu/index.php>

AHT 2990 Women, Art and Power

This art history course will explore the nature of gendered representation in the history of art from the Renaissance to the present day. While the primary focus will be on the representation of women and the work of women artists, the construction of masculinity in the arts will also be addressed. Art will be examined in relation to its political, social, economic, and religious context to establish the broader implications of these visual documents. The course is organized thematically and will cover: the mother figure, self-representation, gender fluidity, Venus/Goddess archetype, object v. creator, and the feminist movement. The student will gain a broadly inclusive understanding of the art tradition as it pertains to women, sensitivity to gender issues, and sensitivity to the gendered nature of representation.

AHT 2990 Arts of Mexico

The artistic traditions of Mexico will be explored in their aesthetic, political, spiritual, and social contexts, from the ancient Olmec to the present. We'll study the great urban centers of Teotihuacán, the Maya, and the Aztecs, and consider the Mexican Baroque, a rich, ornate mixture of Indigenous, European, and North African cultures that emerged after the Spanish Conquest. In the nineteenth century, newly independent Mexican artists depicted a burgeoning national identity in landscape, genre painting, printmaking, and portraiture. The course will also introduce twentieth-century modernists Diego Rivera, Frida Kahlo, José Clemente Orozco, David Alfaro Siqueiros, and Rufino Tamayo, and discuss contemporary artists who address issues of equity, class, and gender.

BU/SM 3990 Sport Media

This course examines the role media plays in contemporary sports, the relationship between sport and sport media, and how these two entities influence the public's perception of the sport's industry. Many professional careers associated with sport media will be discussed including sports information, public/media relations, journalism, and broadcasting. Students will learn how to conduct interviews with sports figures, create media and promotional materials, write game and feature stories, and to effectively utilize social media as a promotional tool.

CAR 2990 The Comic Cover

In this course, students will create 4 covers for comics ranging from Action to Indie to Manga comics. In-class exercises will include how a cover is created from the initial sketch to the final touches. Through instructor led demonstrations, students will create cover art using provided typesets and prompts along with the opportunity to create covers for their own books.

CJ 2990 Community Corrections Course description coming soon

HS 3990 The New England Puritans

Perhaps no group of people in American history are more famous but more misunderstood than the New England Puritans. In this class, we will go beyond buckle hats and Thanksgiving dinners to explore how Puritans thought (and worried) about capitalism, race, sex, war, and, of course, witchcraft.

ILL 3990 Interactive Character Improv

Taking character development in a community direction, students will use characters in interactive exercises with each other and each other's characters. Working from a small personal community of characters, students will use improvisation exercises to meet, learn of, and interact with others' communities, creating individual and group narratives. Projects will include a prompt in each class involving interviewing, drawing, and refining each other's characters, and working on team stories.

ILL 3990 Science Fiction & Fantasy Art

This course will focus on the Science Fiction & Fantasy Illustration genre. Students will complete assignments with a variety of topics including Magic Cards, Sci-Fi movie posters, book covers along with in-class exercises focused on character and environment concept designs, compositional studies, and more.

LAS 1110 Relationship Status Complictd

This course is a philosophical look at the evolution and deconstruction of the subject/object dichotomy between humanity and nature. Through our analysis of this problem, students will engage the thought of some of the most pivotal thinkers in the history of philosophy. The course opens in Ancient Greece at the dawn of the concept of "Nature" and philosophy's initial attempt to gain dominion over an otherwise chaotic world ruled by the Gods. Through Socrates and Plato, students will trace the early history of humanity's separation from nature via the soul/body dichotomy. After tracing the evolution of that dichotomy through the Middle Ages and the history of Christianity, the course turns to 17th century thinker, Rene Descartes, who formalizes it as the Subject/Object dichotomy for the modern era. Finally, through Martin Heidegger in the 20th century, students will engage in an existential analysis of our being-in Nature and our rootedness in the World, finally deconstructing the Subject/Object dichotomy and restoring our forgotten relationship between humanity and nature.

LAS 1110 Was Thanos Right

In the spring of 2018, movie fans were introduced to a villain made popular in comics just two decades prior: Thanos, The Mad Titan. This character left an impact on fans, not just for doing the unthinkable—defeating The Avengers—but by doing so with a plight many movie-goers saw as sympathetic for a comic book villain. Thanos' goal was to wipe out half of all life in the universe in order to prevent its finite natural resources from being depleted by overpopulation. Fans found themselves conflicted over whether or not Thanos was correct in his methods, leading many to ask the question, "Was Thanos right?"

In fact, many pieces of film and literature present similar stories of a world at risk of depleting its resources, leading to famine, drought, and dystopia. In this class, we will take a closer look at several such films, comics and short stories to discuss, not whether the solutions taken to address them were correct, but whether or not the premise of those stories was correct. Are these “finite” resources really at risk of running out, and if so, is this there a better way of addressing that?

LAS 1110 Will Climate Change My Life

As we enter the social and environmental disruptions of a rapidly changing climate, what is, and will be, the impact on you? This course is designed to help students understand a global environmental problem in the context of their own lives. To reach this point students will research and discuss the scientific method, climate research techniques, and the current predictions of climate change impacts on a global, national and regional scale. We will explore the inherent social issues of a global event including climate refugees, social justice, economic disruption, and cultural change and how these could impact students. Given a background in the current science, students’ final project will be to design a lifestyle concept map. It will serve as a visual framework of the impact of climate change on an individual, and an outline of behavior that could reduce greenhouse gasses and mitigate the impact of climate change

LAS 1120 Civil Disobedience

For many, the notion of disobedience is perceived as innately immoral. We are taught the virtue of following the rules, and our moral and civic obligation to obey the laws and customs of the land, i.e. to “don the knapsack of custom.” Yet, Henry David Thoreau, in his rejection of the Polk presidency, asked if “the citizen ever for a moment, or in the least degree, [must] resign his or her conscience to the legislator?” Moved by those instances in which disobedience seems not only acceptable but obligatory, Thoreau reconstructed the notion of what it meant to be a good citizen by centering meaningful civic engagement on disobedience instead of on obedience. But this new understanding brings with it a new set of questions: When are we obliged to disobey unjust laws? When is it morally just to disrupt economic activities, practices, and institutions that are marginalizing society? Are there limits? When is it morally just to disrupt ecological activities, practices, and institutions that are ecologically harmful? Are there limits? When is it morally just to use technology to disrupt those activities, practices, and institutions whose benefits are self-serving? What is our obligation, as citizens and individuals, to preserve and protect the state? Is disobedience only an external phenomenon? Using Thoreau’s three-tiered framing of meaningful disobedience, this course will ask students to consider multiple scenarios through which disobedience can be construed as both morally and politically acceptable – if not obligatory. The course will utilize an Open Educational Resource (OER) text, website, and interactions constructed by the instructor. Media will include literature, film, music, infographics/visuals, and scholarly readings.

LAS 1120 Conflict on Campus

How do hundreds or thousands of students from all walks of life come together on a college campus to form a community? Not easily, that’s how. This course takes a hands-on approach to the many ethical and social issues facing American college campuses today, from cheating and plagiarism to free speech and campus protests. Spotlighting the community of college students on America’s campuses, this course covers a diverse array of social, ethical, and political issues that concern the civic environment and democratic values campus communities today. Beginning its journey across the campus with a foundation in moral theory, the course then considers such topics as: academic integrity, speech and protest, affirmative action, sports, alcohol and drugs, hazing, religion on campus, sex, date rape and sexual harassment, plus contemporary issues in the national news and on NEC’s own campus. Students will cover multiple case studies and real-life scenarios, including those right here on the NEC campus, and gain valuable skills in recognizing the complexity of issues and dealing with them in a thoughtful and critical manner.

LAS 1120 The Humanity in Sport

Sport can be considered a microcosm of society because of its many different social issues that are also reflected in society at large. Examples include racism, gender inequity, social class exclusion, greed and corruption, diversity, and violence. However, when viewed as a culturally valued human practice (Arnold, 1992), sport can become a power vehicle for fostering important human values and beliefs such as fairness, respect, freedom, compassion, and democracy. Thus, the purpose of this class is to: 1) familiarize students with a variety of social issues that occur in sport as they relate to human rights, 2) examine these various issues through sociological and philosophical lenses, and 3) develop students’ understanding of the “practice view of sport” which can in turn be used to appreciate the application of important moral and societal values.

LAS 1120 The Queen’s Gambit

As an LAS 2 on the Civic Environment this course will explore themes of power relevant to feminism, politics, privilege, and the struggle for human rights, as viewed through the lens of the Netflix series, "The Queen's Gambit." In the process, students will learn the history of chess and how strategies of power play out endlessly in the events around us. Students will also have the opportunity to create their own short series based on course content and their own creativity.

LAS 3110 Eastern Views, Western Eyes

For a thousand years, this tiny island nation of Japan was protected by its rugged terrain from the hordes of invading Mongolians and from the intrusive Western culture. Learn how a homogeneous people became a dominant force in the global economy, yet preserved a unique perspective based on its culture and history. Gain new insight into our own culture by seeing how others view the world.

OE 1990 Winter Skills Course Course description coming soon

PHO 3990 Visualizing Contemporary Issues

Contemporary art, as we experience it in galleries, museums and online includes more and more multi-medium/multi-media approaches and visualization of concepts and ideas. The default method of working in many mediums starts with the prescribed or chosen medium (painting, photography, printmaking, etc.) and only then the artist is called to express their chosen topic/concept and solve the visual problem within the medium's boundaries and capabilities. "Special Topics: Visualizing Contemporary Issues" will attempt to reverse this equation and to encourage the students to experiment in any medium or art-form they desire for each assignment and topic. The class will introduce current issues that are widely explored and expressed in contemporary art across many different mediums. Each topic will be presented to the students through a lecture, prescribed readings with class discussion and a unique assignment that will propel the student to find the appropriate medium to express their idea/point of view regarding the discussed topic. Every assignment will be followed with in depth critique/discussion.

PL 2990 Chasing Phil. Thrh Literature

Philosophy analyzes the core questions of what it means to be human. Unfortunately, the responses returned are often more difficult to understand than the questions themselves, and, at times, of life itself. In this course, we will use literature to chase answers to some of the questions that have been evading philosophical resolution for millennia. Why use literature? Literature does not pretend to understand these same questions completely or resolve these same questions "once and for all". Literature assumes our "unhandsome condition" as a starting point. We are afforded therefore only temporary stays, fleeting glimpses, into these vital questions. As Stanley Cavell has noted, the importance may not be so much in the finding as in the founding of our responses. Questions pondered might include the following: "Is there a purpose somehow lurking out there?"; "Do you have to be evil to get ahead in this world?"; "Is justice a childish outdated myth?"; "Why is suffering woven into the fabric of our existence?"; "Who am I?"; "Will I or some part of me survive my death?". This course satisfies the LAS 6 requirement.

How to Register on MyNEC

- Log in to MyNEC (<http://www.nec.edu/students-faculty-staff/>)
- Click on "FERPA Declaration, Student Services & Financial Aid"
- Click on "Registration"
- Click on "Add/Drop Classes"
- Choose the correct term- Winter – 2021 7 Weeks
- Enter CRN numbers and hit "Submit Changes"
If you need to find an additional class, click on "Class Search".
- To see all of the classes offered, click on the top "Subject", drag through the list. You can then refine your search to look by department, LAS requirement, etc.
 - Click on "Course Search"
 - This will bring up all of the class offerings for the term.
 - NOTE: Classes that are at the 5000-level or above are graduate courses and you may not sign up for them.
 - Closed classes have "C" on the left, open classes have box.
 - To sign up for the class, click on the box and a check will be inserted.
 - Click on "Register" at the bottom of the page.
 - If the class will work with your schedule, it will be added.
 - If there is a problem (time conflict, prerequisite) you will see a red error box.
- To confirm you are registered, return to the Registration Menu and select "Student Detail Schedule."
